REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claims are allowable over the prior art of record because the prior art fails to show or suggest, either singly or in combination thereof, a seat back structure of vehicle seat, an elastic back support means provided in one side of said seat back for resiliently supporting the back of said occupant, a back board means provided on the opposite side of the seat back, a movable connection means for connecting the elastic back support means and said back board means with the seat back so as to allow displacement of the back board means in a direction from a home position to one of the sides of said seat back, while allowing the elastic back support means to be resiliently warped in a direction to one the sides of said seat back; a stopper means for preventing movement of said back board means from the home position toward the one side of said seat back, and a biasing means for normally biasing said back board means to the home position. The back board means is retained by the stopper means at the home position, thereby withstanding a first load applied to the other side of the back board means, and wherein, by contrast, when a second load is applied in a direction to one side of the seat back, said elastic back support means is resiliently warped toward the one side of said back board means, which in turn causes the back board means to displace toward the other side of said seat back against a biasing force of said biasing means, so that both the elastic back support

means and the back board means are resiliently displaced toward the other side of said seat back.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
